Experience

Technical Support and Network Administration

January/2017 - November/2019

High School - Complejo Educativo Maria Auxiliadora, Chalchuapa, Santa Ana

- Created, configured, managed and monitored local area networks (LAN), ensuring system stability, connectivity, and security.
- Identified and resolved technical issues in hardware and software, enhancing cybersecurity through critical updates and patches.
- Implemented basic network security practices, such as access control and secure device configurations.
- Coordinated a team of students to maintain the technological infrastructure, assigning tasks and ensuring operational efficiency.

Software projects

Log Analyzer - Personal project

January 2025

Python tool for extracting and analyzing key data from log files using regex and keyword searches.

- Search by Keyword: Search for specific keywords within the log file.
- Extract Timestamps with IPs: Extract timestamps along with the associated IP addresses.
- Extract Full Log Entries: Extract complete log entries based on IP addresses, timestamps, or specific keywords.

Password Generator - Personal project

January 2025

Secure password generator with customizable length and character options.

- Strong, customizable password generation
- Check if the password belongs to a dictionary.

Job board - Personal project

June - December 2022

A web application for a job board using Java EE (Jakarta EE 9.1.1).

- Developed a web application using Jakarta EE, implementing CRUD operations and REST APIs for seamless back-end functionality.
- Utilized secure HTTP protocol handling for network communication and implemented robust error management.

Certifications

Google Cybersecurity Certificate

Online

Google

Certification date: January, 2025

EF SET English Certificate 53/100 (B2 Upper Intermediate)

Online

EF Standard English Test (EF SET)

Certification date: October, 2024

One Oracle Next Education F2 T5 Back-end

Online

Oracle + Alura Latam

Certification date: September, 2023

Skills

Programming languages: (*Experienced*) Java (*Competent*) Python, SQL (*Familiar*) JavaScript

Languages: (*Native*) Spanish (*B2*) English

Soft skills: Problem-solving, Ability to tackle complex technical solutions

Others: (*Experienced*) Debian (*Competent*) Linux, Tcpdump, Ffuf, Git, REST APIs, HTTP, SQL/MySQL/MariaDB/Postgresql, Web Proxy Interception, OWASP ZAP (*Familiar*) SIEM tools, TCP/IP, Splunk, NIST CSF, ISO/IEC 27000, Burp Suite, Web Vulnerability Identification, Automated Web Application Scanning, Whois, Fingerprinting.
